Notes:

1 GP Data as at 1 October 1999 and 30 September 2000-2009
2 Nursing and midwifery figures exclude students on training courses leading to a first qualification as a nurse or midwife.
3 Headcount Practice Nurse figures are estimated for 1999 based on the 1997 fte to headcount ratio.
4 To make the census data comparable with the Review Body for Nursing Staff and Other Health Professionals definitions, qualified Allied Health Professionals (AHPs) now include Speech & Language Therapists (previously these were included in Other Qualified ST&T staff). For comparability historical data has been reassigned to match the revised definition. The numbers of AHPs will not match those published in previous years.
5 In order to avoid double counting Hosptial Practitioners & Clinical Assistants (HPCAs) are excluded from the all doctors totals, as they are predominantly GPs that work part time in hospitals (applies to headcount data only).
6 In 2006 ambulance staff were collected under new, more detailed, occupation codes. As a result, qualified totals and support to ambulance staff totals are not directly comparable with previous years.
7 GP Registrar count for 2008 & 2009 represents an improvement in data collection processes and comparisons with previous years should be treated with caution
